Transport of equipment for calibration within EU countries: Transport of the equipment to and from the calibration laboratory is possible in person, or the entire transport to and from the laboratory is provided by the customers themselves at their own expense. The laboratory does not provide transport.

Transport of equipment within non-EU countries: Transport and customs procedures related to the transport of the equipment to and from the calibration laboratory are provided by customers at their own expense or through an intermediary service. The laboratory does not perform customs procedures or provide transport.

The exact date of the calibration must be agreed in advance with the calibration laboratory staff.

Ing. Dušan Abaffy, PhD.Director of the Department of Hydrology
and Hydrotechnics
